

Systemtech *IPG/7200*

SSL Gateway

Easily Enable Required SSL Encryption Capability on Your IP-Based EFT Systems

Introducing the perfect solution for ensuring the security of ATM and payment transactions flowing through your existing electronic funds transfer system infrastructure.

Systemtech SSL gateways are ideally suited for customers with networks that are already IP-based, and are sending transactional data over the public Internet (or in some cases, a private IP broadband network), but need to enhance security for transactions... *without the added investment of upgrading all the existing equipment on the network.*

The IPG/7200 is a node on the network and the transactions flow through the unit simply to wrap the transactions in SSL Encryption before sending via the Internet to the processor. The IPG/7200 uses the latest accepted standards for SSL encryption. This gateway solution provides a fast, flexible and secure IP-based platform for sending transactions and data over Internet connections.

Systemtech's family of Internet payment gateway devices and solutions is rapidly becoming the clear choice of leading solution providers, VARs and integrators. So contact your favorite supplier today, and accelerate your company's transition to IP-based savings!

-  **SSL security for existing ATM and EFT Devices**
-  **Latest SSL Encryption Standards**
-  **Automatically Sends Transactions Wrapped in SSL Encryption**
-  **No Changes to Current Transaction Applications or Requirements**
-  **No Re-Occurring Costs or Monthly Fees**

Systemech *IPG/7200*

SSL Gateway

Technical Specifications

IP Protocol Support

IP TCP	HTTP DHCP/BootP	Telnet rTelnet
-----------	--------------------	-------------------

Security & Encryption

Open SSL	3DES
----------	------

Remote Management & Diagnostics

Web-Browser Remote Interface
Field Upgradeable Flash
Remote & Local Diagnostics

Hardware Interfaces

10/100 Base-T Ethernet RJ45 802.3
Universal Locking Power Supply

Packaging & Environmental

Physical 6.3 x 5.75 x 2.1 inches
Weight 1.25 Pounds
CD-ROM configuration and documentation
ESD Protection
Operating Temp 0 to 50 degrees C
Storage Temp -10 to 70 degrees C
Humidity 10% to 90% non-condensing
