

Systemtech *IPG/7000 Series*

Internet Payment Gateways

Introducing the perfect combination of cost savings, protection of investment, and revenue enhancement for IP-based payment transactions.

Systemtech dial-to-IP gateways permit POS payment terminals, POS payment controllers, check readers and ATMs to simply and efficiently re-route transactions via the Internet or private IP network instead of dial up telephone lines.

Monthly recurring costs for phone lines may be eliminated in favor of a single, high-speed Internet connection. Costs per transaction may be lowered. Previous investments in credit and debit terminals may be maintained. Transaction times may be dramatically reduced, eliminating costly queues and increasing revenue.

Systemtech Internet Gateways are secure because they use the latest accepted standards for SSL encryption. No changes are required to your existing POS terminals or applications.

Need a special twist for a unique application? Systemtech has horsepower to spare, and can accept custom programs for in-store decision making and routing.

Systemtech gateways are the clear choice of leading payment processors everywhere. So contact your favorite processor today, and accelerate your company's transition to IP-based savings!

- ❖ Lower-cost IP Transactions
- ❖ Higher-Speed IP Transactions
- ❖ No Recurring Transaction Fees
- ❖ No Changes to POS Applications
- ❖ IP and PPP Transports
- ❖ Open SSL & 3DES Encryption
- ❖ Multiple Messaging Formats
- ❖ POTS and Serial Port Interfaces
- ❖ Dial Back-up Option
- ❖ Custom Application Support
- ❖ World-Class Diagnostics

Systech *IPG/7000 Series*

Technical Specifications

IP Protocol Support

IP	PPP	Telnet
TCP	DHCP/BootP	rTelnet
HTTP		

Security & Encryption

Open SSL	CHAP
3DES	PAP

Remote Management & Diagnostics

- Web-Browser Remote Interface
- Field Upgradeable Flash
- Remote & Local Diagnostics
- Pin-level Diagnostics & Remote Trace

Hardware Interfaces

- 10/100 Base-T Ethernet RJ45 802.3
- RJ-11 POTS Line Interface
- DB-25 DCE/DTE Selectable Serial Interface
- Universal Locking Power Supply
- Status LED Indicators

Packaging & Environmental

- Physical 6.3 x 5.75 x 2.1 inches
- Weight 1.25 Pounds
- CD-ROM configuration and documentation
- Mounting Brackets
- ESD Protection
- Operating Temp 0 to 50 degrees C
- Storage Temp -10 to 70 degrees C
- Humidity 10% to 90% non-condensing
